EXPERIENCE

Fresher

- Gained hands-on experience during training sessions at Tops Technologies
- Built multiple small-scale projects focused on user interface development using Flutter.

PROJECT

Food app

- **Description** : This Food App is a simple Flutter application designed to showcase a list of food items along with their details, such as names, descriptions, prices, and images. The app is entirely static and built using Flutter's widgets like ListView, GridView, and Card to display food items.

Book My Event

- **Technologies:** Flutter, Dart, API Integration
- **Description:** Created a mobile application, serving as a Mobile App Developer, that allows users to search and book events online. Implemented API integration for data retrieval and booking processing, and designed a user-friendly interface to ensure seamless interaction and enhanced user experience.

Chat app

- **Description:** The Chat App is a Flutter application designed to enable real-time messaging between users. It leverages Firebase services, including Firebase Authentication and Cloud Firestore, to provide a seamless and secure chat experience. This app focuses on simplicity, making it ideal for learning the integration of Firebase with Flutter.
